

Introduction

Everyone working in the hospice is bound by a legal duty of confidentiality to protect the person-identifiable, sensitive or confidential information they may come into contact with during the course of their work. This is not just a requirement of their contractual responsibilities but also the requirements of the Data Protection Act 2018 and subsequent data protection legislation plus the common law duty of confidentiality.

It is important that the hospice protects and safeguards confidential personal and business information that it gathers, creates, processes and shares in order to comply with the law, relevant NHS regulatory requirements and to provide assurance to patients and the public.

This policy also sets out the requirements placed on all staff when sharing information within the hospice, plus externally with NHS and non-NHS organisations.

Information can be corporate as well as related to patients and staff (including temporary staff) however stored. Information may be held on paper, USB devices, computer files or printouts, laptops, mobile phones, digital cameras, in CCTV recordings or even heard by word of mouth.

Compliance with Statutory Requirements

- Access to Health Records Act 1990
- Caldicott Principles
- Common Law Duty of Confidentiality
- Computer Misuse Act 1990
- Data Protection Act 2018
- General Data Protection Regulation
- Human Rights Act 1998
- Information Security Management: NHS Code of Practice 2007
- NHS Confidentiality Code of Practice 2003
- Public Interest Disclosure Act 1998
- The Health and Safety at Work Act (1974)

Scope

This policy applies to all persons (including hospice employees, volunteers, students, researchers, service providers, visitors, contractors or any other persons who have access to confidential hospice or service user information of any kind, no matter how obtained whether on hospice premises or in other locations).

All persons working within the hospice, receiving care from the hospice, their relatives or friends, and supporters are entitled to be treated knowing that their personal information will be managed confidentially. Also, that such information will only be used for the purposes for which consent was given or for which a lawful basis for processing has been determined by the hospice.

All persons who contribute to the hospice can similarly be assured that their personal information will be managed confidentially and only used for the purposes for which consent was given, e.g. donors who Gift-Aid their contributions. This policy applies to all personal information processed, stored on computer or relevant filing systems (e.g. manual records) or Close Circuit Television and any extracts taken either printed, copied, or verbal.

Confidential information within the hospice is commonly thought of as health information. However, it can also include information that is private and not public knowledge or information that an individual would not expect to be shared. It can take many forms including patient level health information, employee records, occupational health records, etc. It also includes hospice confidential business information.

Policy Statement

The lawful and correct treatment of personal information is vital to the successful operation of and maintaining confidence within the hospice and the individuals with whom it deals.

Therefore, the hospice will, through appropriate management, apply the following rules for confidentiality:

1. Confidential information about service users or patients should be treated confidentially and respectfully by:
 - Maintaining trust and respect as a priority
 - Respecting professional confidentiality obligations
 - Ensuring the care record is as complete as possible, accurate and fit for purpose
2. Members of a care team should share confidential information when:
 - It is needed for the safe and effective care of an individual
 - It is relevant, necessary and proportionate
 - There is an absolute imperative because of a threat to the safety of others e.g. safeguarding
3. Data that are collected while providing direct care can provide benefits for the community. Where no lawful justification exists, non-identifying (i.e. anonymised) data must be used for a purpose other than direct care, e.g. to support the improvement of care services.
 - In exceptional circumstances it may be necessary to share confidential information but this requires informed consent or there is a legal obligation to share for a particular purpose e.g. in the public interest
 - Confidential information can be shared when there are sufficient controls to ensure a 'trusted environment' e.g. an information sharing agreement with restrictions on linking information to prevent the re-identification of individuals
 - For all the lawful methods of sharing information, all of the following three conditions should be met:
 - Individuals should be informed about how their confidential information may be shared or used
 - The minimum amount of confidential information should be used to support the purpose for which it is collected

- Data protection legislation should be checked to ensure there are no legal restrictions on sharing particular pieces of information
4. An individual's right to object to the sharing of their confidential information should be respected, the considerations being:
- Objections should be considered consistently and individuals should receive an explanation of the likely consequences of their actions
 - When individuals object to the sharing of confidential information by the hospice, confidential information will not be shared
 - When an objection to the sharing of confidential information, anonymised information can be shared which will respect their wishes
 - Where the likely consequences of an objection pose such a significant risk that the objection is lawfully overruled, individual should receive an explanation e.g. in relation to a notifiable disease
5. The hospice should put policies and procedures in place to ensure the rules for confidentiality are followed, which will include:
- Appointing a senior individual responsible for ensuring the confidentiality rules are followed
 - Completing an annual Data Security and Protection Toolkit Assessment
 - Ensuring that all organisations with which it shares information are committed to following confidentiality rules
 - Encouraging people to report concerns that the confidentiality rules have not been followed

Person-identifiable information is anything that contains the means to identify a person, e.g. name, address, postcode, date of birth, NHS number and must not be stored on removable media unless it is encrypted as per the hospice Removable Media Policy or a business case has been approved by a member, or members of the Information Governance Sub Group.

In addition, it is strictly forbidden for employees to knowingly browse, search for or look at any personal or confidential information relating to themselves, their own family, friends or other persons, without a legitimate purpose. Action of this kind will be viewed as a breach of confidentiality and of the Data Protection Act 2018.

When dealing with person-identifiable or confidential information of any nature, staff must be aware of their personal responsibility, contractual obligations and undertake to abide by the policies and procedures of the hospice. If staff have concerns about this issue they should discuss it with their Line Manager or Information Governance Lead or SIRO

Any breach of confidentiality, inappropriate use of health records, staff records or business sensitive/confidential information, or abuse of computer systems could be regarded as gross misconduct and may result in serious disciplinary action up to and including dismissal.

A summary of Confidentiality Do's and Don'ts can be found in Appendix A.

Responsibility / Accountability

Chief Executive

The Chief Executive has overall responsibility for strategic and operational management, including ensuring that the hospice policies comply with all legal, statutory and good practice guidance requirements.

Senior Information Risk Owner

The Senior Information Risk Owner is responsible for ensuring the implementation of the requirements outlined within this policy and ensuring that training is provided for all staff groups to further their understanding of the principles and their application and that confidentiality is included in corporate inductions for all staff.

Caldicott Guardian

The Caldicott Guardian is responsible for ensuring implementation of Caldicott Principles with respect to patient-identifiable information.

Information Governance Lead

The Information Governance Lead is responsible for maintaining the currency of this policy and providing advice on request to any member of staff on the issues covered within it. In addition, to investigate reported incidents and escalate serious breaches to senior information governance management if required.

Head of People and Culture

The Head of People and Culture is responsible for ensuring that the contracts of all staff are compliant with the requirements of the policy.

Line Managers

Line Managers are responsible for ensuring that the policy and its supporting standards and guidelines are built into local processes and that there is on-going compliance. They must ensure that any breaches of the policy are reported in line with the hospice incident reporting process. Managers are also expected to support staff with the completion of an incident reporting form if required.

All persons who come into contact with confidential information

Confidentiality is an obligation for all staff and those working on hospice premises. There is a confidentiality clause in their contract and they are expected to participate in induction, training and awareness-raising sessions carried out to inform and update staff on confidentiality issues.

All persons should report confidentiality breaches using the hospice Information Governance incident reporting form and check with their line manager to assist with its completion if necessary.

Senior Leadership Group

The Senior Leadership Group (SLG) oversees the development and implementation of Information Governance in the hospice and ensures that the organisation complies with supporting the legal and, where appropriate, the NHS regulatory framework with regard to information governance.

Policy Monitoring and Review

This policy will be reviewed on a three yearly basis or more frequently if legislation or regulatory guidance or other hospice policies directly linked to this determine that the policy needs to be amended.

Audit plan

Good practice requires that all organisations that handle person-identifiable or confidential information put in place processes to highlight actual or potential confidentiality breaches in their systems and also procedures to evaluate the effectiveness of controls within these systems.

This hospice will establish appropriate confidentiality audit procedures to monitor access to confidential person-identifiable information.

Audits will be carried out no less frequently than annually.

This function will be co-ordinated by the SLG in conjunction with the electronic patient record System Administrators, Information Asset Owners and Administrators.

Changes to this policy

The hospice reserves the right to update or amend this policy at any time; please check on a periodic basis for the latest version
